PROJECTS

Text Analyzer

The text analyzer project highlights a tool that processes and analyzes text data. It offers features like word count, change the paragraph to Uppercase, Lowercase and Copy the text. And i have added a dark mode feature on it to make it attractive.

Url Shortener

This is a the shortener project showcases a tool that transforms lengthy URLs into concise, easy-to-share links. In this i have used html, css and javascript. And i take the api of tiny Url in my project to shortened the Url. Despite being short, they redirect users to the original, full-length URL.

Personal Portfolio Website

Designed and developed a personal portfolio website using React, Tailwind CSS, and Vite. The site features a responsive layout, interactive elements, and a showcase of my projects and skills. Implemented features such as dynamic project cards, a contact form, and custom animations to enhance user experience. Technologies: React, Tailwind CSS, Vite, JavaScript, HTML, CSS.
